Subject: Lane Plating Phase I Presentation: CAG Suggestions

Kenneth,

Below is a summary of the CAG's suggestion for the presentation:

- A better visual for groundwater and sediment sampling reporting, including being able to see the well and contamination close-up.
- Data points on maps labeled with larger text.
- A 3d or gradient map to show groundwater wells and depth, including the layer of clay.
- A slide that summarizes all the work done to date on the site.
- A slide that summarizes the contaminants of concern, and what we'll do to investigate further.

Thanks,

-Ed-
